OBJECTIVE

With Around 2 years of experience in full-stack software development, I have engineered scalable backend systems using Java, Python, and built responsive web interfaces with React and Node.js. I'm looking for a full-time Software Engineer role where I can contribute to high-impact projects, write clean and efficient code, and continue growing in a fast-paced, product-focused environment.

EXPERIENCE

Software Engineer - Saayam For All

May 2025 - Present

- End-to-end development of scalable web and mobile interfaces using **React**, **React Native**, and **Tailwind CSS**, improving UI responsiveness across platforms.
- Architect and maintain **REST APIs** in **Spring Boot**, **Python (FastAPI)**, and **Go**, optimizing data flow and reducing API latency by **40%**.
- Deploy and manage containerized microservices on **AWS EKS**, integrating **Kafka** for inter-service communication to ensure high availability and fault tolerance.
- Automate testing, deployment, and monitoring through **CI/CD pipelines** and **AWS CloudWatch**, boosting release efficiency by **45%**.
- Collaborate with a distributed engineering team on modules for **real-time donation tracking**, **volunteer-service requests**, and **payment gateway (Razorpay & Stripe) integrations**.
- Conduct code reviews, write unit/integration tests, and apply performance profiling to maintain production-grade quality.
- **Key Focus: React ,React Native , Tailwind CSS , JavaScript, Spring Boot , FastAPI , Go , REST API Design AWS EKS, Kafka, Docker, CI/CD, AWS CloudWatch, Microservices, Payment Gateway Integration, Agile Development, Git / GitHub.**

Software Engineer - Vigos Solutions

January 2023 - July 2023

- Designed, developed, and maintained **scalable ETL pipelines** using **Python**, **Airflow**, and **AWS S3**, automating daily ingestion and transformation of **1M+ retail records**.
- Built and optimized a **PostgreSQL data warehouse** with partitioning and indexing strategies to support complex analytical queries and reporting.
- Created **Power BI dashboards** for real-time business insights, reducing manual reporting time by **60%** and enabling faster decision-making.
- Implemented comprehensive **data quality frameworks** with validation, logging, and alerting, cutting inconsistencies by **40%** and improving pipeline reliability.
- Collaborated cross-functionally with analytics, product, and engineering teams to define data models, establish SLAs, and ensure consistent data availability for stakeholders.
- **Key Focus: Python, Apache Airflow, SQL, PostgreSQL, Power BI, AWS S3, ETL/ELT Pipelines, Data Modeling Data Quality Automation, Dashboard Design, Git, CI/CD Practices**

TECHNICAL SKILLS

Programming Languages: Python, Java, C, C++, JavaScript, TypeScript, SQL

Frameworks & Web Technologies: ReactJS, Node.js, REST APIs, HTML5, CSS3, Django, Spring Boot

Machine Learning & Data Science: TensorFlow, PyTorch, Scikit-learn, OpenCV , NLP, CNNs, Jupyter, AWS SageMaker

Databases & Cloud Platforms: PostgreSQL, MySQL, MongoDB, SQLite, BigQuery, AWS, GCP, Kubernetes, Terraform

DevOps & Tools: Docker, Git, GitHub, CI/CD, API Gateway, Hadoop, Postman, Power BI, Tableau, Figma, MCP

EDUCATION

California State University, San Bernardino - Master of Science in Computer Science

(May-2025) CGPA: 3.67

SASTRA Deemed University - Bachelor of Technology in Computer Science

(June-2023) CGPA: 3.20

ACADEMIC RESEARCH

Research Assistant

January 2025 - May 2025

California State University, San Bernardino

 GitHub

- Built a secure, scalable UPI simulation platform using **Node.js**, **Express**, and **SQLite**, with a **React** frontend powered by **Vite** and **Axios**.
- Implemented **JWT-based authentication** with secure login and signup functionality.
- Enabled features such as **UPI ID generation**, balance viewing, money transfers, and transaction history.
- Integrated **real-time form validations**, alert messaging, and auto-search functionality using email-based UPI ID.
- Designed user-focused features including sending and receiving money, and real-time transaction tracking.
- **Tech Stack:** Node.js, Express, React, Vite, SQLite, Sequelize, JWT, Axios
